

JOHN XAVIER

iOS Developer · Swift · SwiftUI · Full-Stack Mobile

Kochi, Kerala +91 9746794357 johnxavieroffice@gmail.com [johnxavier.online](#) [wayspot.in](#)

iOS Developer with 4 years of professional experience shipping production apps across fintech, healthcare, social, marketplace, booking, and real estate domains. Strong in Swift, SwiftUI, UIKit, async/await, REST APIs, Firebase, MVVM, and end-to-end App Store delivery. Recently launched Wayspot, a full-stack travel discovery product built with SwiftUI, Vapor, PostgreSQL, Flutter, and Next.js. MSc Software Engineering with Distinction, Staffordshire University, UK.

SKILLS

Languages	Swift, Objective-C, Dart
iOS	SwiftUI, UIKit, Core Data, MapKit, StoreKit, Push Notifications (APNs), Core Location
Architecture & APIs	MVVM, MVC, async/await, Swift Concurrency, URLSession, Codable, REST APIs, JSON
Testing & Delivery	XCTest, TestFlight, App Store Connect, Xcode Cloud
Tools & Services	Xcode, Git, Firebase, Stripe, Swift Package Manager, Postman, Google Cloud Console
Backend & Web	Vapor, Fluent ORM, PostgreSQL, Next.js, Vercel, Render
Other	Flutter, Agile/Scrum, VOIP integration, Apple/Google Sign-In, Apple Maps, Google Maps

RECENT PROJECT

Wayspot — Full-Stack Travel Discovery App | [App Store](#) · [wayspot.in](#)

2024 – Present

SwiftUI (iOS) · Flutter/Dart (Android, in development) · Vapor · Fluent · PostgreSQL · Next.js · Vercel · Render · Google Cloud Console

- Built a native SwiftUI iOS app with async/await networking, MVVM architecture, destination detail views, category browsing, favourites, and server-driven content.
- Designed and built a REST API backend using Swift Vapor, Fluent ORM, and PostgreSQL, consumed by both the iOS and Flutter Android clients from a shared API architecture.
- Managed an independent DevOps lifecycle: deployed the backend on Render, configured secure Google Sign-In token validation via Google Cloud Console, and automated iOS builds using Xcode Cloud.
- Built a full admin panel and marketing website in Next.js, deployed on Vercel, enabling content management without direct database access.
- Owned the complete product lifecycle independently: branding, App Store submission, screenshots, metadata, and TestFlight distribution.

PROFESSIONAL IOS EXPERIENCE

iOS Developer | [Srishti Innovative, Trivandrum](#)

Nov 2020 – Aug 2022

- Led a team of 4 developers, maintaining a 100% on-time delivery record across 6 client production apps using Agile methodology, with full ownership of sprint planning, code reviews, and App Store releases.

- Delivered 6 production iOS apps across fintech, social, healthcare, booking, and matrimony domains for clients in the US, Australia, Israel, and India.
- Introduced SwiftUI to new projects, driving adoption of modern iOS development practices across the team.
- Centavizer (fitness rewards marketplace): Sole developer for the marketplace module, shopping basket, and Stripe payment integration; led a full UI redesign of the entire application.
- TimeBox (social app): Implemented VOIP calling, Firebase real-time messaging, and scheduled future media delivery with complex background delivery scheduling.
- ExtraHourz (US gig-worker marketplace): Built location-based job discovery using MapKit and Sign in with Apple/Google, integrating backend APIs for live gig listings.
- Maternia, EasyBooking & Nikah in Kerala: Built health metric logging and tutorials (Maternia), booking with calendar management (EasyBooking), and matrimony search/matching flows (Nikah) using Swift/UIKit with REST API integration.

iOS Developer | [Brokwill Technologies, Kochi](#)

Jun 2019 – Oct 2020

- Knatree (family tree app): Built relationship mapping, a social news feed, and in-app chat with media sharing; integrated Firebase Realtime Database and FCM for real-time messaging and push notifications.
- InvStars (real estate investment platform, Australian market): Implemented project listings, member enquiries, agent connections, and in-app chat via REST API integration with a server-based backend.
- Exless (loyalty app, collision repair sector): Built insurance excess discount flows, exclusive deals, and vehicle information features using Firebase for a first-of-its-kind loyalty programme.
- Designed UI/UX, maintained code quality, and delivered all three apps within client deadlines.

iOS Developer | [Mobtecnica Consultancy, Kochi](#)

Mar 2017 – Sep 2017

- Alerts Buddy: Developed a school management iOS app in Objective-C and Swift for event planning and parent communication.

Web Developer & Motion Graphics Designer | [Ezek Digital, Thodupuzha](#)

Oct 2017 – Jun 2019

- Built responsive client websites using PHP and JavaScript; created motion graphics and video ads; managed end-to-end project delivery from requirements to deployment.

EDUCATION

MSc Software Engineering — Distinction | [Staffordshire University, UK](#)

Sep 2022 – Nov 2023

- Dissertation: developed a deep learning-based tool to automatically detect and improve code quality issues in Java projects.

B.Tech Computer Science | [MG University, Kottayam](#)

2011 – 2015

ADDITIONAL EXPERIENCE

Warehouse Colleague — DHL, United Kingdom

Jan 2024 – Dec 2025

Maintained full-time employment to fund living expenses post-graduation in the UK while independently developing the Wayspot full-stack product, before returning to India to resume iOS development.
